Get Your EtherNet/IP Scanner Connected Directly to Your Legacy Allen-Bradley PLC

The 460ESETC moves data between an EtherNet/IP scanner device and up to five Allen-Bradley PLCs.
Move data from your EtherNet/IP scanner device to low-level legacy Allen-Bradley PLCs like the MicroLogix, SLC 505, and PLC 5E.

How Do I Use the 460ESETC-N2E in My Application?

You allocate two data table blocks in your Allen-Bradley PLC. One area is write only locations accepting data from your EtherNet/IP device. The other is read only data to send to your EtherNet/IP devices.
It's really that simple.

Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.
